

## Suggested Bible passages

Here are some further Bible passages that could be the basis for a sermon in a service with a more general theme of the importance of Christians being involved in education.

### **Proverbs 2:1-11**

The importance of developing wisdom and understanding. God is the ultimate source of these. As Christians in education we can point people towards God.

### **Deuteronomy 6:1-9**

Parents have a responsibility to teach their children the ways of the Lord. In our culture this is shared with schools and churches. Each is to be encouraged to play their part and to support one another.

### **Luke 2:41-52**

Jesus as a student – listening and being listened to. Jesus grew in wisdom, in stature, in favour with God and in favour with people – that is intellectually, physically, spiritually and socially. Children need a balanced and holistic education. Christians understand the spiritual dimension of life and are well placed to offer their services to the world of education.
